Email Gateway

Keep Email-borne threats out of your Networks

With best-in-class performance validated by independent testing firms, tbEmailGateway delivers advanced multi-layered protection against the full spectrum of email-borne threats.

tbEmailGateway helps your organization prevent, detect, and respond to email-based threats including spam, phishing, malware, zero-day threats, impersonation, and Business Email Compromise (BEC) attacks.

Protection Against Email-borne Threats

Powerful anti-spam and anti-malware are complemented by advanced techniques like outbreak protection, content disarm and reconstruction, sandbox analysis, impersonation detection, and other technologies to stop unwanted bulk email, phishing, ransomware, business email compromise, and targeted attacks.

Validated Performance

Fortinet is one of the only email security vendors to consistently prove the efficacy of tbEmailGateway through independent testing.

Fabric-enabled Email Security

Integrations with TechBridge products as well as third-party components help you adopt a proactive approach to security by sharing IoCs across a seamless Security Fabric. It also enables advanced and complementary email security protection for Microsoft 365 environments through API-level integration.

Key Features:-

- Multi-layer anti-virus protection

- Zero-hour anti-malware detection

- 99.9% spam detection with dual engines

- Sensitive Data Redaction from documents and images

- Document and Image Sanitization

- Structural and Message Sanitization

- Built in compliance dictionaries

- Choice of email encryption options

TechBridge
Making the World Smarter

Privacy

You have all personal data on your own hard disk, you can control the email security, inspect transaction log. No other organization can see the content of all messages.

Secure By Default

End users are forced to use mail services through secure connections (POP3/IMAP/SMTP over TLS, webmail with HTTPS). Emails are encrypted in transit using TLS if possible. Passwords are stored in SSHA512 or BCRYPT (BSD).

Webmail

Manage mails, folders, sieve filters, vacation directly on an intuitive and easy to use web UI.

Calendars/Contacts/ActiveSync

Manage your calendars, address books, tasks on an easy to use web UI or your mobile devices (iOS, Android, BlackBerry 10, Windows Phone).

Unlimited Accounts

Forget about the products which pricing based on number of mailboxes, you can create as many mail accounts (domains, users, mailing lists, admins) as you want.

Backends

Stores mail accounts in your favorite backend: LDAP, MySQL, MariaDB, PostgreSQL.

Main Stream Linux/BSD

tbEmailGateway works on Red Hat Enterprise Linux, CentOS, Debian, Ubuntu, FreeBSD, OpenBSD. No matter you switch to which Linux/BSD distribution supported by tbEmailGateway, you get the same setup in just few minutes.

Web Admin Panel

Manage your mail accounts with a web admin panel. tbEmailGateway ships a free and easy to use web admin panel along with it's product.

Domain-Level Admins

Either promote a mail user to domain admin role, or create a separated domain admin account to manage his/her own mail domains.

Self-Service

Allow users to login to manage their own preferences like password, mail forwarding, white/blacklists, quarantined mails, basic spam policy.

Per-user Service Control

Just one click to enable or disable mail services for mail user: POP3, IMAP, SMTP, sieve filter, mail forwarding, BCC, and more.

Throttling

Global, per-domain and per-user throttling based on: max size of single message, number of max inbound/outbound messages per time unit.

Antispam

Manage greylisting, whitelists, blacklists, spam policy, quarantined emails. You can even whitelist or blacklist sender/
recipient in quarantined mails with one click.

Searching

Search accounts with domain name, email address, display name. You can also manage searched accounts in search result page, such as enable/disable/
delete account.

Log Admin Activities

tbEmailGateway logs normal admin activities, such as account creation, activation, removal, password change, and more.

Multi-language Support

Thanks to our translators, web UI of tbEmailGateway supports multiple languages: English, German, Spanish, French, Italian, Polish, Chinese, and more.
