Swiss Army Knife for Remote Access!!

tbVidolyRD lets you centralize and manage all your remote tools and protocols into one easy-to-use platform.

IT departments are responsible for managing and controlling access to an ever-growing inventory of on-site and off-site servers, computers and devices. Yet relying on multiple remote connection tools and password managers is inefficient, frustrating and unsecure. Instead of being treated to streamlined clarity, IT pros, sysadmins and help desk technicians struggle with ongoing chaos. The solution is to centralize remote connection technologies, remote machine data, password management, and access control on a platform that is secure, scalable, and refreshingly simple to use.

tbVidolyRD comes to the rescue by centralizing all remote connections on a single platform that is securely shared between users and across an entire team. It supports hundreds of integrated technologies — including multiple protocols and VPNs — along with built-in enterprise-grade password management tools, global and granular-level access controls, and robust mobile applications to complement desktop clients for Windows and Mac. It helps empower IT departments to drive security, speed and productivity throughout an organization, while reducing inefficiency, cost and risk.

Features:-

- Simplify Remote Connection Management

- Enhanced Security

- Powerful password management

- Monitor Access to Critical Assets

- Alleviate the Administrative Burden

- Broaden your Console Integration

Simplify Remote Connection Management

tbVidolyRD is mandatory when trying to implement a privileged access management strategy throughout an organization. It simplifies and strengthens the management of all credentials and access controls by configuring and centralizing all your data in a secure repository which can easily be shared between users. Launch highly secure and reliable connections to privileged sessions, remote servers, virtual machines, websites and applications, all from a single platform.

Enhanced Security

tbVidolyRD helps organizations implement heightened security and reinforce data protection from all threats. It is critical for all organizations to securely and centrally control and manage access to privileged accounts and critical assets by provisioning password access to users.

Powerful Password Management

tbVidolyRD uses its powerful capabilities to store and manage all passwords, credentials and privileged accounts in a safe and secure password vault, providing incomparable control and visibility over your IT environment.

Monitor Access to Critical Assets

Security needs to be constrictive and privileged accounts need to be monitored at all times in order to keep systems safe from both external cyber criminals and insider threats. Detailed reports help evaluate an enterprise's level of information security and enhance control of access to privileged accounts.

Alleviate the Administrative Burden

tbVidolyRD eases the administrative burden by empowering your administrator with simple and intuitive tools that are specifically designed to ease management – whether on the road, in the office or without internet access – without having to compromise a high level of security.

Broaden your Console Integration

Systems integration brings many benefits to organizations – from cost savings to greater flexibility and improved accuracy of information and data.
tbVidolyRD allows you to broaden your console integration with the widest choice of supported technologies.

Specifications

Security
- AES-256 encryption

- Double encryption with your own passphrase or certificate

Two-Factor Authentication (2FA)
- Supports a wide range of 2FA

Supports Multiple Protocols
- RDP
- SSH
- VNC
- Telnet

Cross Platform Availability
- PC
- MAC
- iOS
- Android
