

# IDENTITY & ACCESS MANAGEMENT

For offering Identity and Access Management solutions that are in line with the operational needs of various industry verticals, TechBridge has established a robust practice with field-tested processes based on standards and tried-and-true frameworks. Our comprehensive IAM solution uses our expertise in the various identity management tools to build solutions that provide easy access to resources while maintaining the confidentiality and integrity of user information. The challenges of today's fragmented identity landscape are effectively addressed.

With the expansion of e-business, organizations are struggling to control secure access to data and applications that are dispersed across a variety of internal and external computing platforms. They must also grant access to an increasing number of users, both inside and outside the firm, without jeopardizing security or disclosing confidential data. The work is made considerably more challenging by the administration of several user identities across various applications.

With the help of our expertise in the various identity management tools, TechBridge's comprehensive Identity and Access Management services successfully handle the issues posed by the fragmented identity landscape of today. We do this by developing solutions that provide easy access to resources while preserving the security and integrity of user information.

We have accredited skills and product experience in the identity management sector because we provide end-to-end services from control objective setup to monitoring, governance, and risk management, working with TechBridge for IAM is a value proposition. Our all-encompassing strategy makes use of the products and solutions that have made TechBridge a recognized authority in security solutions.
