tbIAM: Identity and Access Management

INTRODUCTION

For offering Identity and Access Management solutions that are in line with the operational & security needs of various industry verticals, TechBridge has established a robust practice with field-tested processes based on standards and tried-and-true frameworks. Our comprehensive IAM solution uses our expertise in the various identity management tools to build high available solutions that provide easy & controlled access to resources while maintaining the confidentiality and integrity of user information. The challenges of today's fragmented identity landscape are effectively addressed.

With the expansion of e-business, organizations are struggling to control secure access to data and applications that are dispersed across a variety of internal and external computing platforms. They must also grant access to continuously changing dynamic users, both inside and outside the firm, without jeopardizing security, integrity or confidentiality of data. The work is made considerably more challenging by the administration of several user identities across various applications.

With the help of our expertise in the various identity management tools, TechBridge's comprehensive Identity and Access Management services successfully handle the issues posed by the fragmented identity landscape of today. We do this by developing solutions that provide easy access to resources while preserving the security and integrity of user information.

We have accredited skills and product experience in the identity management sector because we provide end-to-end services from control objective setup to monitoring, governance, and risk management, working with TechBridge for IAM is a value proposition. Our all-encompassing strategy makes use of the products and solutions that have made TechBridge a recognized authority in security solutions.
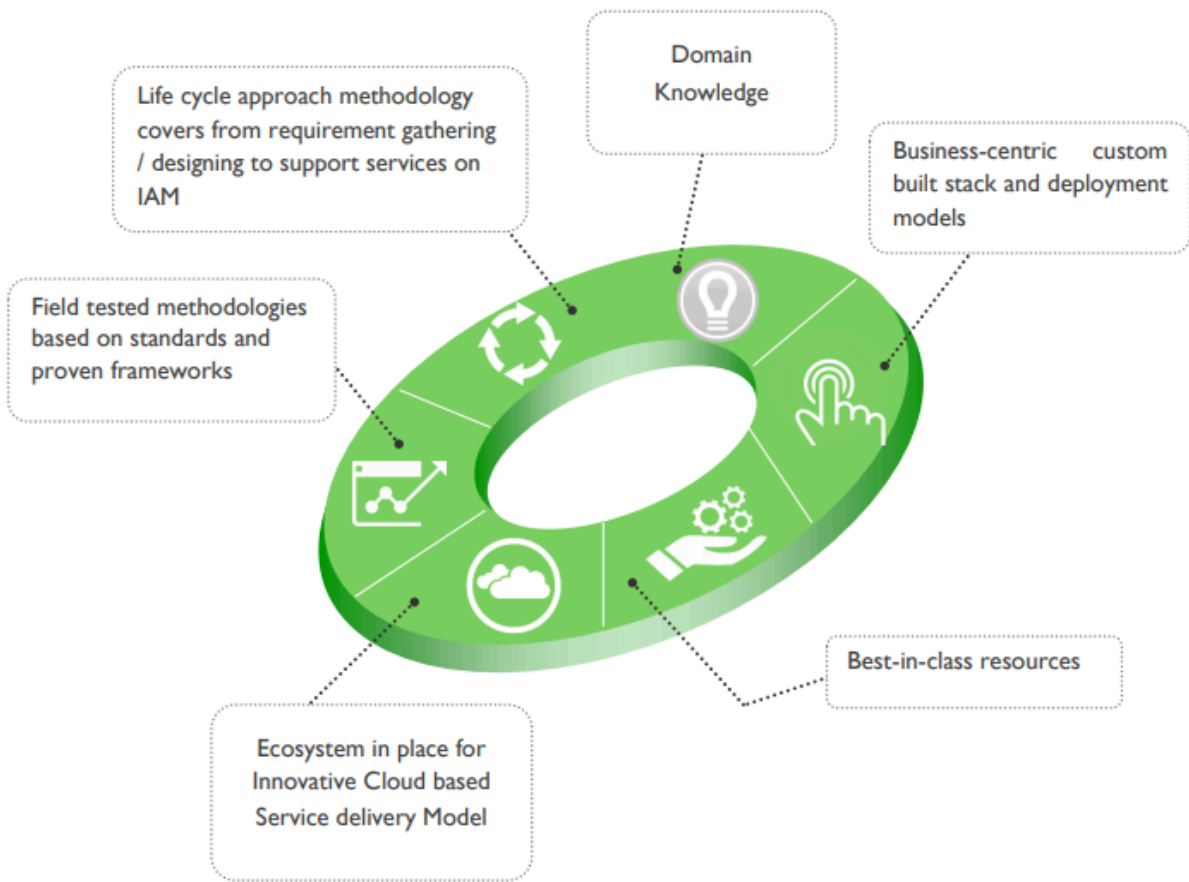

Key Benefits

- Single Sign On (SSO)
- Access Management
- Biometric Authentication
- Security & Confidentiality
- Accounting Management
- MFA (Multi Factor Authentication)
- Personal Data Handling Compliances
- Seamless User Management Integration

Zero Trust based Identity Management System

TechBridge
Making the World Smarter

KEY DIFFERENTIATORS

Life cycle approach methodology covers from requirement gathering / designing to support services on IAM

Domain Knowledge

Business-centric custom built stack and deployment models

Field tested methodologies based on standards and proven frameworks

Best-in-class resources

Ecosystem in place for Innovative Cloud based Service delivery Model

DELIVERY METHODOLOGY

Requirement Analysis
Information gathering and scope definition

Design Phase
Architecture and solution design

Support & Maintenance
Training, post production support

Deploy
IDAM setup, application integration, UAT

Production Roll-Out
Migration from UAT to production, go-live
